## People with intellectual and developmental disabilities need you now...

### ***More than ever!***

Today, it is estimated that approximately 2.5% of the general population in the United States is diagnosed with an intellectual or developmental disability. Despite medical advances, there will always be disabilities that occur at birth or later in life. The Arc of Story County serves over 300 individuals of all ages to thrive in their community with full inclusion and freedom of choice. Because a disability impacts the family as well as the individual, The Arc offers a wide variety of services to help the family stay strong and

unified. We invite you to join us in fulfilling our vision of improving systems of supports and services for the population with disabilities by connecting families, inspiring the community, and influencing public policy. Each member makes our voice stronger and more effective at the local, state, and national levels. ***Join now and become a part of our strength!***
